DETAILED ACTION

Allowable Subject Matter

1. Claims 1-70 are allowed.
2. The following is an examiner's statement of reasons for allowance: There is no evidence in the prior art searched of an apparatus and method for non-destructive characterization of electronic properties as claimed, especially that the detection step includes the filtering of the Planck-mediated thermal emissions from the recombination-induced infrared emissions. Prior art references such as Mandelis (5,667,300) disclose photocarrier radiometry methods similar to one claimed but fail to disclose this specific filtering step.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
